Chapter 2

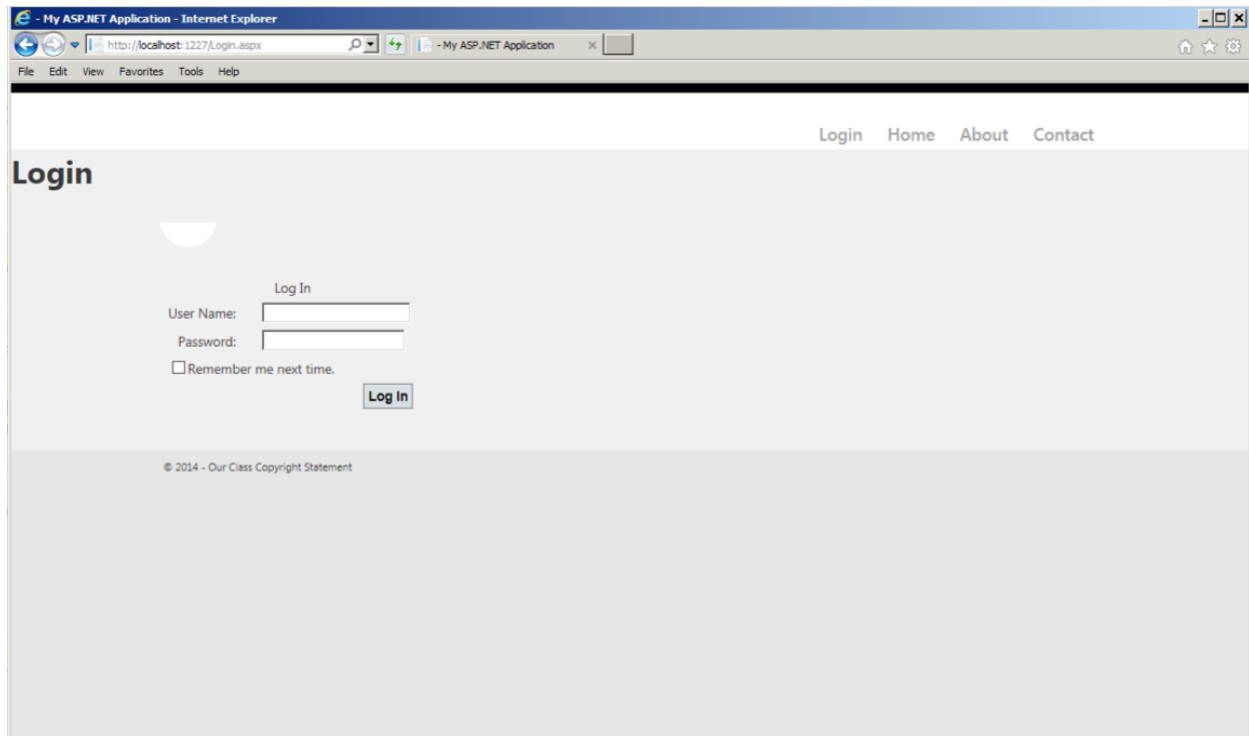

Pages Needed

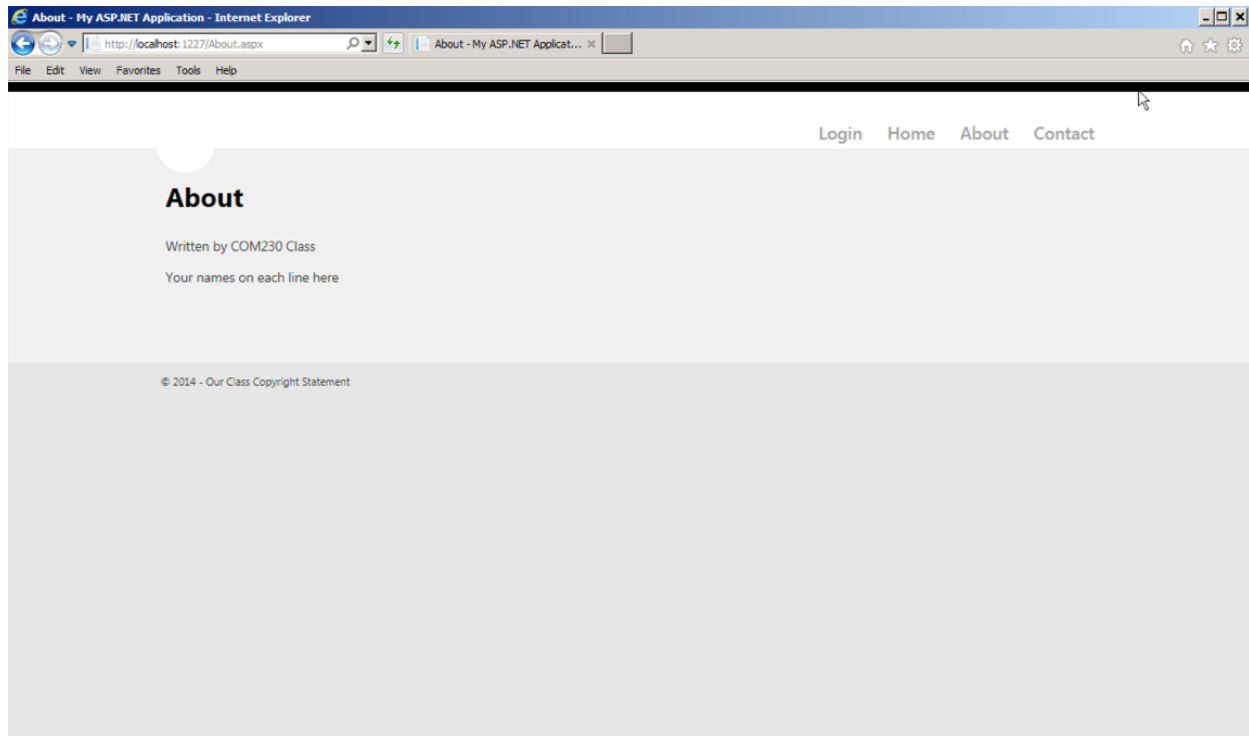

Requirements:

- This should be the main page after log in.
- In the middle of the page, #1 thru 5 is a link to the respective page

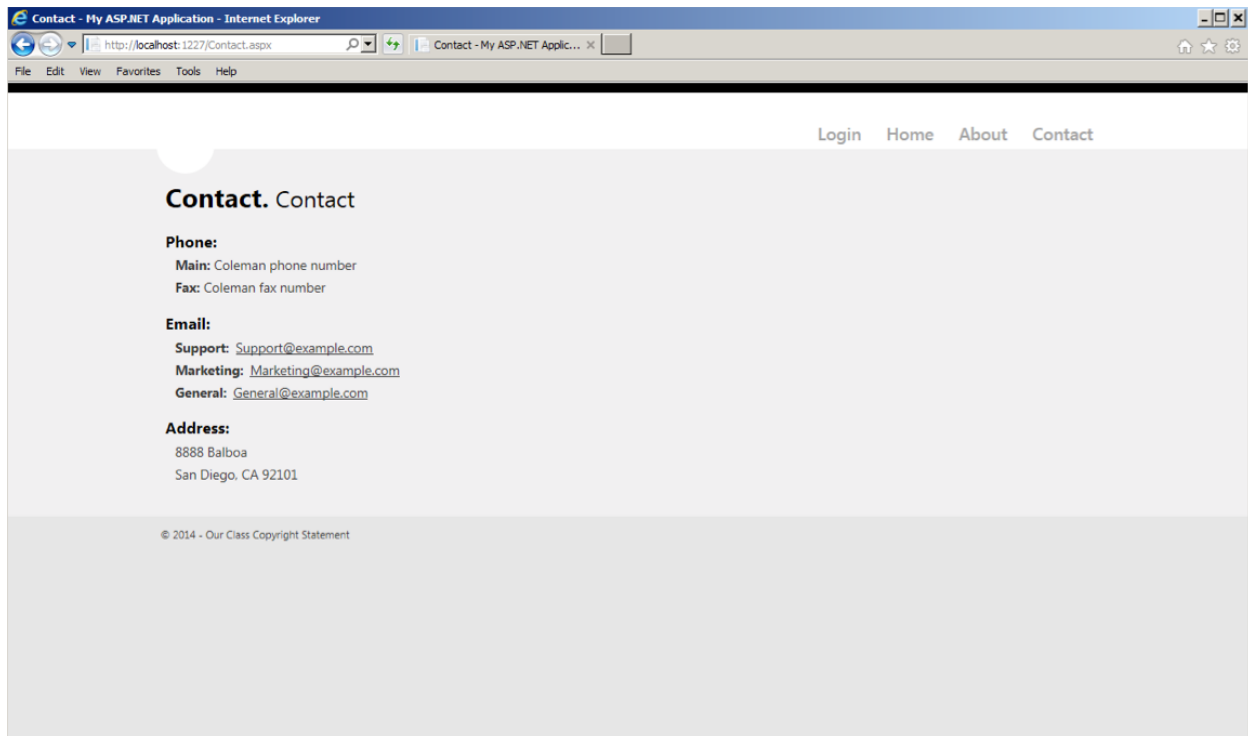

- Every page should show the menu at the top consisting of LOGIN, HOME, ABOUT, and CONTACT. You might consider making a Master format page that can be included on each page that congaing the header and footers as well as section formatting.

**Requirements:**

- This should be the first page that a user sees
- Enforce login before any other page can be accessed
- Only Human Resource people and Administrators should be able to login. You will need a login user table here.
- Every page should show the menu at the top consisting of LOGIN, HOME, ABOUT, and CONTACT. You might consider making a Master format page that can be included on each page that congaing the header and footers as well as section formatting.

**Requirements:**

- Every page should show the menu at the top consisting of LOGIN, HOME, ABOUT, and CONTACT. You might consider making a Master format page that can be included on each page that congaing the header and footers as well as section formatting.

Requirements:

- Every page should show the menu at the top consisting of LOGIN, HOME, ABOUT, and CONTACT. You might consider making a Master format page that can be included on each page that congaing the header and footers as well as section formatting.

My ASP.NET Application - Internet Explorer

Department

Field	Value
Department Name	<input type="text"/> <input type="button" value="New"/>
Location (Building Number)	<input type="text"/>
Manager	<input type="text"/>

© 2014 - Our Class Copyright Statement

Requirements:

- Every page should show the menu at the top consisting of LOGIN, HOME, ABOUT, and CONTACT. You might consider making a Master format page that can be included on each page that congaing the header and footers as well as section formatting.
- There should not be any duplicates of Department Name and Manager Name. Duplicate Department Names are OK.
- The Manager should not be blank.

The screenshot shows a web browser window titled "My ASP.NET Application - Internet Explorer". The address bar shows "http://localhost:1227/Employees.aspx". The page has a navigation menu with links: Login, Home, About, Contact. The main content area is titled "Employees" and contains a form with a table structure:

Field	Value
Employee Name	<input type="text"/>
Location (Building Number)	<input type="text"/>
Phone Number	<input type="text"/>
Hourly Rate	<input type="text"/>

Below the table are buttons for "Save" and "Delete". A "New" button is also present. The footer of the page reads "© 2014 - Our Class Copyright Statement".

Requirements:

- Every page should show the menu at the top consisting of LOGIN, HOME, ABOUT, and CONTACT. You might consider making a Master format page that can be included on each page that congaing the header and footers as well as section formatting.
- Only Administrators can make changes here
- There should not be any duplicates. You must test for this and prevent entry.
- Employee Name should not be empty

My ASP.NET Application - Internet Explorer

Login Home About Contact

Deductions

Field	Value
Employee Name	<input type="text"/> <input type="button" value="New"/>
Deduction Description	<input type="text"/>
Amount of Deduction	<input type="text"/>

© 2014 - Our Class Copyright Statement

Requirements:

- Every page should show the menu at the top consisting of LOGIN, HOME, ABOUT, and CONTACT. You might consider making a Master format page that can be included on each page that congaing the header and footers as well as section formatting.
- There should not be any duplicates. You must test for this and prevent entry.
- The Employee must exist in order to add deductions here.
- Employee name cannot be empty
- The Amount field must be between 1 and 100

**Requirements:**

- Every page should show the menu at the top consisting of LOGIN, HOME, ABOUT, and CONTACT. You might consider making a Master format page that can be included on each page that congaing the header and footers as well as section formatting.
- This is a display that only system Administrators can access.
- Gross Pay minus all of the Deductions for an Employee equals Net Pay
- Display 1 line per Employee per pay date on this report

Chapter 3

The Process

This project will be implemented as an AGILE process. That means that at the beginning of each day, each team member will be given up to 5-minutes to describe the following:

1. Their progress on the project
2. Any issues that they may have with the project.

I will act as the project manager. Team leaders will be responsible for tasking the members of their team. They will be responsible for task completions.

Here is the schedule for upcoming events in this class:

1. 2/19
2. 2/20
3. 2/24

4. 2/26
5. 3/3
6. 3/5 -- Terminology due
7. 3/6
8. 3/10
9. 3/12 -- Final
